Introduction:

Welcome to Blossomee, where skincare meets purity, confidence, and sustainability. We believe that everyone deserves skincare that is safe, effective, and kind to the planet. That's why our products are made with clean, non-toxic ingredients, eco-friendly packaging, and a commitment to cruelty-free beauty. Whether you have sensitive, dry, oily, or combination skin, Blossomee is designed to help you feel good in your own skin naturally. Blossomee is a clean, sustainable, and cruelty-free skincare brand designed for all skin types. Our mission is to promote confidence

Audience:

Blossomee is for young people and individuals who want to embrace their natural beauty and feel confident in their own skin. Whether you're starting your skincare journey, dealing with sensitive skin, or simply looking for products that align with your values, Blossomee is for you. Our products are designed for those who care about what they put on their skin and how it impacts the world. We welcome skincare lovers who want **affordable, gentle, and eco-friendly** solutions without compromising on quality or ethics. If you believe in self-care that also cares for the planet, then Blossomee is your perfect match.

Accomplishment for this website:

1. Empower Confidence -Through Skincare we want to help people, especially young individuals, feel beautiful and confident by offering skincare that enhances their natural glow without harsh chemicals or harmful ingredients.

2. Promote Clean Beauty - Our goal is to educate and encourage people to choose safe, non-toxic, and cruelty-free skincare products that are better for their health and the environment.

3. Protect the Planet - We are committed to sustainability, using eco-friendly packaging, responsibly sourced ingredients, and ethical production practices to reduce our environmental impact.

4. Make Quality Skincare Accessible – We believe that everyone deserves high quality skincare, so we ensure that our products remain affordable without compromising on quality.

5. Give Back to Nature – Blossomee is not just about skincare; it's about caring for the world around us. We support reforestation efforts, reduce plastic waste, and advocate for a cleaner, greener future.

Major Design Changes & Challenges:

When I first imagined creating this website, I had a vision of how I wanted it to look and function. However, as I worked on

it, I encountered many challenges that made me rethink my approach. I dedicated weeks to building and refining my design, and through this process, I learned so much. One of the biggest challenges for me was understanding the grid system. At first, it was difficult to grasp how to properly position images and text, but as I continued working on the website, I started to understand layout structures, spacing, and alignment. Now, I feel much more confident in organizing elements on a webpage, which is a skill I know will help me in future projects.

Learning a New Skill:

As a computer science major, I often feel lost in many of my classes, unsure of what's happening. But I love that feeling because it means I am here to learn and grow. Before this project, I had no idea how websites were built or what went on behind the scenes of the beautiful and creative pages we see online. Now, I can proudly say that I created something from scratch, using the knowledge I gained in class. It feels incredibly rewarding to see my hard work come together. I have learned HTML, CSS, how to position images and text, how to resize images, and how to structure a webpage properly. This journey has been both challenging and fulfilling, and I am grateful for everything I have learned.

Looking to the Future:

This experience has given me a **newfound confidence** in my abilities. I now have skills that I can use not only in my future career but also to **help small businesses in my country** by creating websites for them. I know that many people will benefit from what I have learned, and I am excited to keep improving

and expanding my skills. This is just the beginning of my journey in web development, and I can't wait to see where it takes me!
